

CHRISLYR JOHN P. TAN

Cebu City, Philippines | +63 932 423 0938 | cjtan2406@gmail.com | github.com/choonhows | choonhows.github.io

EDUCATION

University of San Carlos

Bachelor of Science in Computer Science

- Third-year undergraduate student; expected graduation: 2027.

Cebu City, Philippines

2024–Present

University of San Jose-Recoletos

Technical-Vocational-Livelihood (TVL), Information and Communication Technology

Cebu City, Philippines

2022–2024

CERTIFICATION

PhilNITS Fundamental Information Technology Engineers (FE) Certification Examination

April 2026

Passer

PROJECTS

Chronos | *Python, FastAPI, PostgreSQL, React, TypeScript, DEAP, Mlxtend*

2026–Present

github.com/saiimonn/Chronos

- Collaborated as one of four developers on a locally hosted automated class scheduling system that uses Association Rule Mining to guide a Genetic Algorithm while keeping hard constraints authoritative.
- Implemented FastAPI and SQLAlchemy services and React/TypeScript workflows for authentication and role-based access control, scheduling, validation, persistence, timetable projection, and CSV/XLSX export.
- Built unit and PostgreSQL integration tests for migrations, APIs, scheduling algorithms, and persistence.
- Designed and operationalized a Jira-GitHub ticketing workflow with dual-ID traceability and AI-assisted MCP commands for ticket intake, branch creation, pull-request review, CI checks, and issue completion to streamline team delivery.

Caledoro | *Flutter, Dart, Riverpod, Hive, Gemini API*

2026

github.com/choonhows/Caledoro

- Collaborated as one of three developers on an offline-first productivity application featuring task management, Pomodoro sessions, calendar tools, and Android home-screen widgets.
- Integrated the Gemini API to analyze user-created tasks and generate smaller, actionable subtasks, helping users break down complex tasks into manageable steps.
- Contributed to feature implementation, debugging, quality assurance, local data persistence, state management, notifications, and responsive application behavior.
- Performed detailed testing and iterative refinement to improve reliability, usability, and overall user experience.

NitPicker | *React, TypeScript, Vite, Tailwind CSS*

2026

github.com/choonhows/NitPicker

- Contributed to a PhilNITS FE preparation platform with configurable mock exams, answer explanations, performance analytics, and previous-exam browsing.
- Implemented UI refinements including skeleton loading states and quality-of-life improvements for smoother user interaction.
- Conducted functional, interactivity, and usability testing and collaborated on responsiveness and workflow refinements.

TECHNICAL SKILLS

Programming Languages: Dart, TypeScript, C#, Python, SQL

Frameworks & Technologies: Flutter, React, Vite, Tailwind CSS, .NET MAUI, FastAPI, SQLAlchemy, PostgreSQL, DEAP, Mlxtend

Development Tools: Git, GitHub, Visual Studio Code, Jira, Docker, Supabase

Mobile & Web Development: Responsive UI development, local data persistence, state management, debugging, quality assurance, REST APIs

AI-Assisted Development: OpenCode, npx-based skills workflows, AI prompting, loop engineering, prompt engineering, context management, token-efficient prompting, Jira/GitHub MCP workflows

Software Quality: Functional testing, UI testing, debugging, usability review, code refinement, Pytest, Vitest, integration testing

CORE COMPETENCIES

Problem Solving • Critical Thinking • Attention to Detail • Team Collaboration • Adaptability • Continuous Learning

• Technical Communication • Time Management
